Army Corps of Engineers accepting comments on Grapevine Lake environmental assessment

The U.S. Army Corps of Engineers, Fort Worth District, announced today that it is accepting comments on the environmental assessment (EA) of the master plan supplement for Grapevine Lake.

The supplement is an update to the most recent version of the lake's master plan, published in 1971. The purpose of the supplement is to designate environmentally sensitive areas on federal land, adopt updated natural resources management objectives, change land use classifications to reflect historical and current recreational use, and establish utility corridors to reduce environmental damage from future utility proposals. The actions proposed in the supplement are the subject of the EA.

The EA identifies the affected environment, project alternatives and addresses the potential environmental consequences of the alternatives. There would be no significant adverse effects to the biological or cultural environments associated with the proposed action. No direct or indirect adverse cumulative effects will result from the proposed action.

The EA is available to the public for review at the Grapevine Lake Office, 110 Fairway Drive, as well as the municipal offices of Grapevine, Southlake, Trophy Club, Roanoke, Northlake and Flower Mound.

Comments on the EA will be accepted until June 23, and can be mailed to U.S. Army Corps of Engineers, Fort Worth District, ATTN: CESWF-PER, PO Box 17300, Fort Worth, Texas 76102-0300.

For more information about the EA or Lake Grapevine master plan supplement, contact Don Wiese at 817-978-2707.
